LeetCode

Summary

Software Developer with hands-on experience in **ServiceNow ITSM, Java, Spring Boot, and React.js**. Experienced in building REST APIs, automating workflows, and building full-stack web applications. Solved **400+ DSA problems** and published an IoT innovation.

Skills

Languages: Java, C++, Python, SQL, PHP

Frameworks & Technologies: Spring Boot, React.js, Node.js, JavaScript, HTML5, CSS3, Bootstrap, Ajax, REST APIs, MVC, Microservices

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating System, Computer Networks, SDLC

Tools & Platforms: Git, GitHub, MySQL, Postman, JDBC, JSON, VS Code, IntelliJ IDEA

Experience

Bangmetric

February 2026 – May 2026

ServiceNow Developer Intern | ServiceNow, ITSM, REST APIs, JavaScript

Noida, New Delhi

- Built an automated Employee Onboarding solution on ServiceNow using **Client Scripts, UI Policies, Business Rules, and Flow Designer** — streamlining multi-stage HR approval workflows and reducing manual intervention.
- Developed **REST API** integrations and configured **Transform Maps** for seamless data migration; implemented **GlideRecord** and **GlideAjax** scripting for server-side logic and asynchronous client-server communication.
- Built operational dashboards, automated notifications, and **SLA-based** reporting to support **Incident** and **Change Management** processes for ITSM stakeholders

Projects

Smart Traffic Control and Monitoring System | Java, Spring Boot, React.js

GitHub

- Architected a real-time traffic monitoring system** using **Spring Boot, REST APIs** for backend data processing and **React.js** for live signal visualization — enabling congestion detection across **4+ intersections simultaneously**.
- Engineered 3 modular backend microservices** with low-latency inter-node communication (**~100ms response time**), and built an interactive operator dashboard with **3-second interval data polling** for dynamic signal state control.

Automated Course-Based Chat System | PHP, MySQL, JavaScript, AJAX

GitHub

- Built a course-based group chat platform in **PHP** and **MySQL** supporting **automatic group assignment for 50+ students**, secured using **bcrypt** hashing, session-based authentication, and **RBAC** across Admin, Instructor, and Student roles.
- Developed an admin dashboard with **AJAX-driven** real-time message updates — eliminating full page reloads, cutting server requests by **~40%**, and reducing average message latency to **under 1 second**.

Achievements & Certifications

- Dean's Top 10% Students (2024-26)** — Recognized among the **top 10% of students** at Lovely Professional University for outstanding academic performance.
- Competitive Programming** — Solved **400+** algorithmic problems across **LeetCode** (krishn_kant) and **Codeforces** (krishn_kant | **Rating: 900+**), with consistent participation in programming contests.
- Patents & Innovations (2025)** — Published an **Intelligent Two-Wheeler Monitoring System**; filed patent for **Smart Bicycle Stand** featuring IoT-based theft detection, accident alerts, and solar-powered multi-factor authentication.
- Responsive Web Design Certification (2025)** — freeCodeCamp (HTML5, CSS3, Flexbox, Grid).

Education

Lovely Professional University

Master of Computer Applications(MCA); **CGPA: 8.08**

Phagwara, Punjab

August 2024 – July 2026

Triveni Satyabhama College

Bachelor of Science in Mathematics; **Percentage: 74.38%**

Nawada, Bihar

April 2021 – July 2024
