Summary

Aspiring Software Developer with a strong foundation in **Java, Data Structures & Algorithms, and full-stack development**. Experienced in building real-time applications using **Spring Boot and React.js**. Skilled in API development, database management, and problem-solving with 300+ coding problems solved. Looking to contribute to scalable and efficient software systems in a growth-oriented environment.

Skills

Languages: Java, C++, Python, SQL, PHP

Web & Frameworks: HTML5, CSS3, Bootstrap, JavaScript, Spring Boot, React.js, Node.js, Ajax

Core Concepts: Data Structures & Algorithms, OOPS, DBMS, Computer Networks, Operating System

Tools & Platforms: Git, GitHub, MySQL, REST APIs, Postman, VS Code, IntelliJ IDEA

Projects

Smart Traffic Control and Monitoring System | *Java, Spring Boot, React.js*

Nov' 2025

- Designed and developed a **real-time traffic monitoring system** to optimize signal coordination and reduce congestion.
- Built scalable backend services using **Spring Boot and REST APIs**, enabling efficient data processing and communication.
- Developed a responsive frontend using **React.js**, providing real-time traffic visualization and improved user interaction.

Automated Course-Based Chat System | *PHP, MySQL, JavaScript, AJAX*

May 2025

- Developed a **real-time chat system** with course-based group management for secure and structured communication.
- Implemented **authentication and authorization mechanisms** using password hashing and role-based access control, ensuring data security.
- Designed an **admin dashboard and AJAX-based real-time updates**, improving system management, responsiveness, and overall user experience.

Achievements & Certifications

- Competitive Programming Achievement – Present:** Solved over 300 algorithmic problems and achieved a Codeforces rating of 800, reflecting strong problem-solving ability and continuous growth in competitive programming.
- Patents & Innovations – 2025:** Published an Intelligent Two-Wheeler Monitoring System and filed a Smart Bicycle Stand, focusing on IoT-based theft detection, accident alerts, and secure solar-powered systems with multi-factor authentication.
- Certifications – 2025: Responsive Web Design (freeCodeCamp)**, gaining strong fundamentals in HTML, CSS, and frontend development.
- Certifications – 2025: Data Analysis with Python (IBM)**, focusing on data analysis, visualization, and Python-based Problem solving.

Education

Lovely Professional University

Master of Computer Application; CGPA: 8.09

Phagwara, Punjab

Since Aug' 24

Triveni Satyabhama College

Bachelor of Science in Mathematics; Percentage: 74.38%

Nawada, Bihar

Apr' 21 – Aug' 24
